

environmentally-friendly than R22 refrigerant. R22 is less stable than R134 because, when the hydrogen compound breaks down in the atmosphere, it releases chlorine before it reaches the stratosphere. The chlorine then reacts with the oxygen molecules in the ozone to create new molecules that result in ozone depletion.

Author Profile

¹**Mohd. Mansoor Ahemad** is an Asst. Professor at the department of Mechanical Engineering, KKR & KSR Institute of Technology and Sciences Guntur. He was specialized in Refrigeration and Air conditioning and having M.Tech Degree from Jawaharlal Nehru Technological University Anantapur.

²**Trinadh Pydipaty** is pursuing final year mechanical Engineering at KKR & KSR Institute of Technology and Sciences Guntur which is affiliated to Jawaharlal Nehru Technological University Kakinada. He completed diploma in mechanical engineering at Govt. Polytechnic Anantapur.

³**Faiz Ahemad Khan Pathan** is pursuing final year mechanical Engineering at KKR & KSR Institute of Technology and Sciences Guntur which is affiliated to Jawaharlal Nehru Technological University Kakinada.

⁴**NareshGottam** is pursuing final year mechanical Engineering at KKR & KSR Institute of Technology and Sciences Guntur which is affiliated to Jawaharlal Nehru Technological University Kakinada.

⁵**Abhinay Joshi Konduru** is pursuing final year mechanical Engineering at KKR & KSR Institute of Technology and Sciences Guntur which is affiliated to Jawaharlal Nehru Technological University Kakinada.

⁶**Rameshbabu Nalabolu** is pursuing final year mechanical Engineering at KKR & KSR Institute of Technology and Sciences Guntur which is affiliated to Jawaharlal Nehru Technological University Kakinada.
