

Figure 6.1: Temperature, velocity, nusselt number and heat transfer coefficient contour at $Re=5000$

8. Conclusion

Three dimensional numerical model of inline circular pin was studied in cross flow of air with isothermal heat transfer surfaces and its various parameters were studied.

Author Profile

Farhat Shaikh received the graduation degree in Mechanical Engineering from Vidyavardhini’s College Of Engineering And Technology, Mumbai University 2011 and pursuing Master of Engineering in CAD/CAM and Robotics from. Fr. Conceicao Rodrigues College of Engineering Bandra Mumbai University. She worked as a Lecturer in Vidyavardhini’s College Of Engineering And Technology and VIVA Engineering College.
